The City needs to answer these questions, Jerry and Al Mooney. Are you responding to Harvey?

Tom,

What are the total revenues collected from water and sewer rates for the following months: 9/14, 10/14, 11/14, 12/14?

To get a handle on the last table you sent Friday that was attached to your communication below, I attached an excel spreadsheet to help me understand this better. The yellow highlighted cell is where I need data filled in. I broke up the potential reduction (\$3m and \$8.4m) and spread them into the monthly and annual even though it sounds like the \$8.4 million for professional services is a one-time or short-term expense. The pink highlight is the % increase in rates based on the table you sent last Friday which is different from the 24% rate increase I calculated...so where did I error?

Assuming there are fixed costs in the current rates via the Flint river, what are they?

Thanks,
Harvey

Tom,

Thanks. I'd like to get such a table out to the Flint stakeholders; however, before doing so, the table probably needs to be modified to better reflect the comparison between Flint River and DWSD.

You may have already seen this (below) blurb from MLive. Also, I had a call from Jerry A. He indicated Veolia is coming to the same conclusion that it may involve tweaking of the process vs some major undertaking. We will know more next week.

I have also attached a table Wayne's & Jerry's staff put together. My sense is there is still this thought that hooking back up to DWSD is cost neutral or nearly so. Hopefully this table shows that is not the case. The info is consistent with we sent you the other day i.e., there is an estimated 30% rate impact.

FLINT, MI -- A water quality expert who has spent years working with environmentalist Erin Brockovich is expected to speak at two events in Flint Saturday, Feb. 14.

Robert W. Bowcock, founder of Integrated Resource Management, met with Mayor Dayne Walling, Councilman Wantwaz Davis and others Friday, Feb. 13.

Bowcock said earlier this week that he believes small treatment and distribution adjustments could help fix some of Flint's water quality problems. He toured the city's water treatment plant Friday. Walling declined to comment on his conversation with Bowcock, but city Councilman Eric Mays said he is anxious to hear his assessment and recommendations.

Davis said Bowcock was straightforward in giving his opinion that the city can cut back on some of the chemicals being used to treat water.

City spokesman Jason Lorenz issued a statement, saying, "The city of Flint honored a request for a tour of its water treatment plant submitted by Mr. Bowcock, as it has done with individuals and groups in the past.

"(Director of Public Works) Director Howard Croft and F-1 Licensed Treatment Operator Mike Glasgow guided the tour and answered all of Mr. Bowcock's questions. Tours of the Water Treatment Plant can be arranged by appointment for interested groups by calling 810-787-6537."

Bowcock is scheduled to join in a march for water quality through downtown Flint, which is planned to begin at 1 p.m. Saturday at Flint City Hall, 1101 S. Saginaw St., and end at The Durant.

Bowcock is also scheduled to speak at a forum at the Saints of God Church, 2200 Forest Hill Ave., Flint, from 3-4:15 p.m.

Brockovich, portrayed by Julia Roberts in a 2000 movie about her fight over the pollution of a California town, has been speaking out on Facebook about Flint's water issues for several weeks.
