Subject: Flint Water Town Hall Meeting Invitation

Mr. Headen:

Many Flint residents can no longer use their water service for basic tasks like drinking, cooking, and taking baths. Lead contamination has resulted in an emergency declaration. National Guard, law enforcement, community groups are all pitching in to deliver bottled water, lead testing kits, and water filters.

How did we get here? What's being done to address the immediate and long-term health and economic impact the Flint water crisis has had on our community?

That will be the focus of a WEYI-TV NBC25 & University of Michigan-Flint Town Hall meeting. "Your Voice, Your Future: The Flint Water Crisis" will be broadcast live from the historic Northbank Center's Grand Ballroom (432 N. Saginaw Street) in downtown Flint on **Monday, February 29th at 7:00 p.m.** The forum will give government, health care, environmentalists, community groups, emergency/disaster response officials, and others the opportunity to speak directly with residents directly affected by the water crisis. We hope the forum will provide people the latest on efforts to restore safe water service to Flint's homeowners, business leaders, schools, and churches.

We believe that you can offer a unique perspective and background on this issue. We would like to invite you to be part of our audience for this important discussion.

Please let us know by Friday (February 12) if you are available to attend this Town Hall meeting. You can RSVP by e-mailing townhall@nbc25news.com.

If you have any questions, feel free to contact the NBC25-FOX66 newsroom at (810) 687-9600.

All the best,

Mike Schram

Subject: Update

Late breaker Terry. As part of the 16 supplemental that's announced Wednesday (not the 17 budget), governor will be announcing creation of a new fund within treasury set aside for statewide infrastructure. Total of \$165 million. Below is how I currently have it written up:

The supplemental request also includes \$25 million for infrastructure needs specific to Flint and another \$165 million to be set aside for statewide infrastructure needs in a newly created Michigan Infrastructure Fund. Michigan's infrastructure was given a D grade by the American Society of Civil Engineers. The new Michigan Infrastructure Fund will be used to make strategic improvements and provide local governments with financial assistance in making necessary improvements to known high-risk lead and copper service lines.
