Question Presented.

You have asked whether financial assistance from a State's Drinking Water State Revolving Loan Fund can be used by eligible entities to fund projects that involve replacing lead service lines that may be on private property and that connect to private dwellings.

Brief Answer

We believe that lead service line projects, regardless of the ownership of the property on which the pipe is placed, may be funded by a State's DWSRF so long as the loans are made to an eligible entity and all other requirements of the DWSRF are met.
